The prior art of record does not teach or fairly suggest a method or apparatus for indexing a plurality of ordered elements stored in bit-reversed order in a first memory and a separate second memory by bit-reversing the element index of a selected element as recited in claims 1, 4 and 8, wherein the MSB of the bit-reversed element index indicates whether the first or second memory storing the selected element, and the non-MSB of the bit-reversed elements index indicates the location of the selected elements within the indicated memory.
